

THE SMARTER WAY TO FORM PAPER TRAYS

## A COMPACT SOLUTION

It's a stand-alone system.  
Designed to optimise production spaces - allowing for higher production.

## HIGH PRODUCTIVITY

A compact system that optimises production spaces, allowing for higher production with an unmatched speed.

## AN INTEGRATED SYSTEM

Combined with the TRAVE® Tray Sealer it allows a high production of finished packs, ready for distribution.

## FLEXIBILITY

The PaperSeal Former allows you to form and laminate all trays within the PaperSeal range.

PAPERSEAL® WEDGE

Although small in size (only 6x3 metres), the PaperSeal Former guarantees high productivity. On one side, there is the loading of flat Paperseal® boards into the magazines and the film reel for the liner while on the opposite side the trays formed and piled up are released.

#### FLEXIBILITY

- Availability of different liners and paperboards offers technical solutions to suit any product.

#### MINIMUM SIZE MAXIMUM SKILLS

- Trays delivered as flat boards significantly reduce distribution storage costs compared to premade trays.

- Presented for Top Seal, Modified Atmosphere, Vacuum Skin formats, Slice, Cook and Wedge formats.

- Recommended for cheese, fresh meats, processed meat, ready-made products, frozen foods, snacks, salad and fruit.

- Liner forming with Zero waste technology reduces cost of final packs.

- Reduced inventory with availability of smaller purchase quantities.

#### SAFETY

- Unique process to generate perfect sealing surface.
- Guaranteed state of the art seal integrity equal to traditional plastic packaging.

#### FULL BRANDING

- 360° communication on all surfaces of the packs.
- High quality graphics for premium branding design.

#### UP TO 90% LESS PLASTIC

- Liner forming station with ZERO technology eliminates all process waste.
- Easy separation of liner from paperboard for simple and efficient recycling at end of life.
- Flexibility on communication formats with printing and/or labelling.
